## About APSCE:

APS College of Engineering (APSCE) was established in the year 1997 under APS Educational Trust, located at N R Colony, south Bangalore which has a history of 80 years of yeoman service in the field of education in Karnataka. It has earned significant name and fame in the state. The college has a vision and mission for offering high quality technical education catering to the students from different states of India. The college is permanently affiliated to Visvesvaraya Technological University (VTU), Belagavi, Karnataka. The institution is spread over a sprawling 100 acres of verdant campus and spacious buildings with well-equipped state-of-the-art laboratories and cutting edge technologies.

### About the Department

The Department of Civil Engineering was started in the year 2012 with an intake of 60 with an aim to impart quality education in the fields of Civil Engineering. The department has a team of highly qualified and dedicated faculty members. In terms of infrastructure, the department is one of the well-equipped and is at par with the leading institutes.

#### Vision

- ▶ To impart quality education for aspiring minds to meet the societal challenges in the field of Civil Engineering.

#### Mission

- ▶ Supportive environment to enhance proficiency in practical and theoretical Civil Engineering Concepts.
- ▶ To synergize the effort of both students and faculty to meet modern infrastructure challenges.

### About RTESE'17

The International Conference on Recent Trends in Environmental Science and Engineering (RTESE'17) aims to become the leading annual conference in fields related to environmental science and engineering. The purpose for organizing this conference is to provide stage for dialogue and debate among all interested participants to address significant issues related to environmental science and Engineering. It provides to enhance the professional expertise and skill development of participants. It helps to evaluate and synthesize data with sound engineering principles, methodologies and the latest technology to create safe and economical solutions to engineering problems for sustainable environment.
